Several pieces of prior art have been discovered, and are applied below in the new grounds or rejection. The delay in discovering and applying this art is regretted.

Claims 3, 9, 57 and 72 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 36, 37, 43-45 and 47 are allowed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1,6-8,10-12,48-55 and 58-71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crouzet et al. (A on the PTO-892 mailed 16 February 2006) in view of Bebee

Art Unit: 1636

et al. (A, newly cited on the attached PTO-892) and any of: Crellin et al. (U, newly cited) or Carrasco et al. (V, newly cited) or Sato et al. (W, newly cited) or Hartley et al. (B, newly cited).

The invention of the instant claims was described previously on the record, except that now the claimed invention is limited at the broadest to recombinases phiC31, P4, Listeria phage recombinase, R4 Sre, CisA, XisF or Tn4451 TnpX.

Crouzet et al. was applied previously against the claimed invention as then claimed.

Crouzet et al. differs from the claimed invention in not teaching the specifically recited recombinases, or their use as recombinases in plant or yeast cells. Bebee et al. teaches, e.g., at the last full paragraph at column 6 and the paragraph bridging columns 6 and 7, that the recombination method taught therein may make use of recombinases from eukaryotes or prokaryotes, including bacteriophage, in yeast or plant cell hosts. Crellin et al. generally teaches the use of Tn4451 TnpX recombinase. Carrasco et al. generally teaches the use of the xisF recombinase. Sato et al. generally teaches the use of cisA recombinase. Hartley et al. teaches, e.g., at column 15, fifth paragraph, that P4 recombinase may be used in recombinant methods.

The substitution of one known element (one of the recombinases of Crellin et al., Carrasco et al., Sato et al. or Hartley et al.) for another (FLP recombinase of Crouzet et al.) would have been obvious to one of ordinary skill in the art at the time of the invention since the substitution of the recombinases would have yielded predictable results, in view of the teachings of Bebee et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James S. Ketter whose telephone number is 571-272-0770. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Low can be reached on 571-272-0951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
